Intro

Welcome to the IK Multimedia SampleTron 2 NKS Library for the Native Instruments Complete Kontrol / Maschine software and hardware.

This library offers NKS file browsing for all factory presets for SampleTron 2. Presets are tagged and include sound previews, full controller map and library artwork.

Compatibility / Requirements

- Supports Complete Kontrol 2.9+ / Maschine 2.17+
- Supports Maschine MK2/MK3/Studio/M+
- Supports All Complete Kontrol Keyboards
- **Supports VST3 version of SampleTron 2**
- Supports PC / Mac
- [IK Multimedia SampleTron 2 Required](#)

This is NKS compatibility files only. This will not work without the actual VST/Library being installed

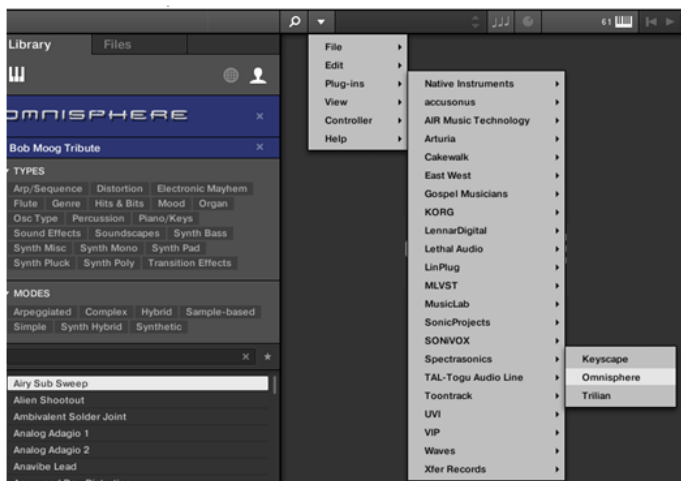

Download

A free version is available that contains a handful of presets for you to test with.

The full version is available for purchase with an immediate download.

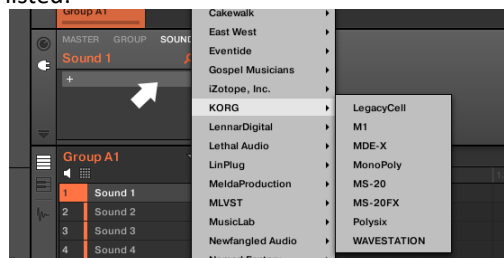

Installation

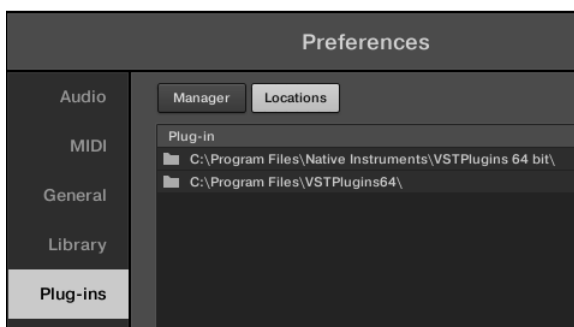

First ensure you have the VST plug-in installed and available to the software. Confirm if you need the VST2 or VST3 version.

In Complete Kontrol It should already appear in your File > Plug-ins menu.

In Maschine open the plug-in browser and check the VST is listed:

If the plug-in does not appear in these locations you need to check the VST is available at the location set within Preferences. Perform a rescan if any changes are made.

Once the plug-in is confirmed installed and working with the software, copy the preset and artwork (if included) to the following locations:

Database Files: Contains the browser images and database details for the Complete browser. Place the "image" and "dist_database" folders in the following location (or copy the sub folders inside these folders if they exist):

Windows: C:\Users\Public\Public Documents\NI Resources

MAC: /Users/Shared/NI Resources

Image Folder Example:

Database Folder Example:

All User library database and image files will be held in these folders with a unique folder for each vendor/plug-in.

NOTE: Be sure to copy the sub folders into the above locations. You want to add the folders with the existing folders. Mac users should be cautious NOT to "Replace" the entire image or database folder with the included ones. You must copy these folders INTO the image and database folders (Merge)

Preset Files: Contains the preset files that need to be added to your user library. Copy this folder to your user library location. By default the user library is located at:

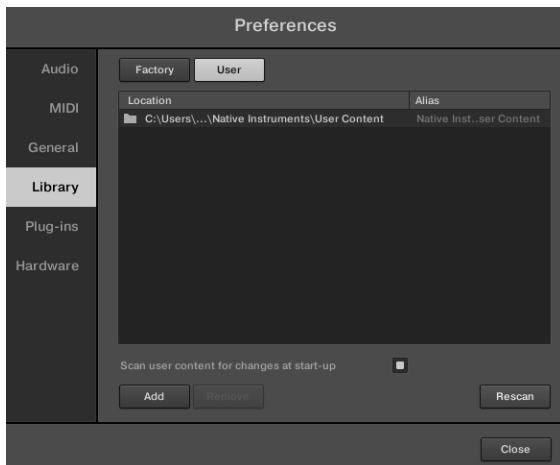

WIN: C:\Users\[USER]\Documents\Native Instruments\User Content

MAC: Users/[USER]/Documents/Native Instruments/User Content

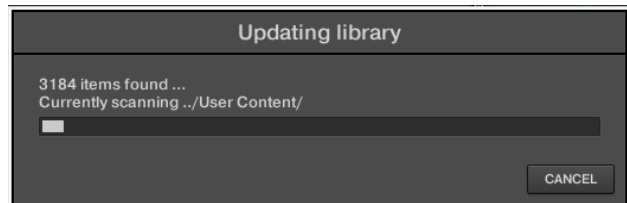

You can confirm this location within the Komplete\Maschine software Preferences > Library > User Library

NOTE: If you already have a previous version of this NKS library you should delete it and replace with the latest version.

After the files have been copied, launch the Komplete Kontrol in STANDALONE mode to do a library update. If the software is not set to auto-scan on start-up, open Preferences > Library then select Rescan

If everything has worked correctly you should now see the plug-in listed in the browser with an assigned category, artwork for the plug-in and the installed presets will be listed in the browser. A new installed library will create a new Bank entry.

Be sure you are looking in the **User Library**  as User created NKS files do not appear in the factory library.

Problems?

If artwork is not displayed or the categories are not created there may be differences in how your VST plug-in is labelled compared to the database files. For all issues please visit the [Forum Thread](#)

The Preset Browser

Presets are accessed by selecting the **User library** icon at the top of the browser . You can migrate these into the factory library if you want, see [This Guide](#)

Controller Mappings

A full controller map covering pretty much all available controls has been designed. One thing to note is the main macro "Attack / Release" controls cannot be mapped as these link to the 3 layers Attack/Release parameters which have been mapped as separate parameters, just the main macro control on the front of the plugin does not offer mapping in a host.

FAQ?

Keep up to date with the latest NKS Library releases, updates and improvements

[Subscribe to our Monthly newsletter](#)

Can these presets be added to the Factory Library?

Yes they can. There are a couple of files that need to be created which are specific to your install locations. There are instructions on how to do this [Here](#)

Which Native Instruments Keyboard/Maschine hardware does this work with?

The NKS libraries will work with ANY Complete Keyboard or Maschine Hardware

I'm not hearing any sound previews?

Check your preview volume is up in the Factory library and check you have a .preview folder with sound files in it. Some presets may have missing files so please report any issues with presets stating the preset name and the instrument/library.

I've noticed some issues

If you find any issues with incorrectly saved presets, sound preview issues, incorrect tagging etc please let us know the details and we will try and fix this up as quickly as possible.

I'm having some installation\usability issues

If you are having issues with installing and using the preset library, check out the [Forum Thread](#) to ask other users who may have some solutions. Also, check above for installation videos. Feel free to contact us if you still have issues.

Images are not displaying for the libraries!

This is normally down to the installation of the database/image folders not being correct. In some cases the plugin name could be different. If you cannot resolve your issue feel free to contact us (links below).

Can I get other VSTs or preset library's created as NKS?

I can only create presets for instruments I own or have a copy of. I am always on the lookout for new VST instruments at good prices so may do more down the track. If you are able to offer me a legal copy of a VST or can transfer me the library I can have a look if it is possible to make NKS compatible. If you are a plugin developere it may also be possible to add NKS compatibility for official factory inclusion. Feel free to contact me.
