NKS PRESET LIBRARY : SOFTUBE MODEL 82
For Komplete Kontrol / Maschine

12 May 2023

freelancesoundlabs.com

Intro

Welcome to the Softube Model 82 NKS Library for the Native Instruments Komplete Kontrol / Maschine software and hardware.

This library contains NKS files for all factory presets allowing browsing and control of the VST. Presets have fully mapped controls, detailed tagging and include sound previews for each preset. Database files and artwork for the NKS browser are also included.

Compatibility / Requirements

- Supports Komplete Kontrol 2.8+ / Maschine 2.16+
- Supports Maschine MK2/MK3/Studio
- Supports All Komplete Kontrol Keyboards
- **Supports VST2 or VST3**
- Supports PC / Mac
- Softube Model 82 VST Required

    This is NKS compatibility files only. This will not work without the actual VST/Library being installed

Download

A free version is available that contains a handful of presets for you to test with.

The full version is available for purchase with an immediate download.

Installation
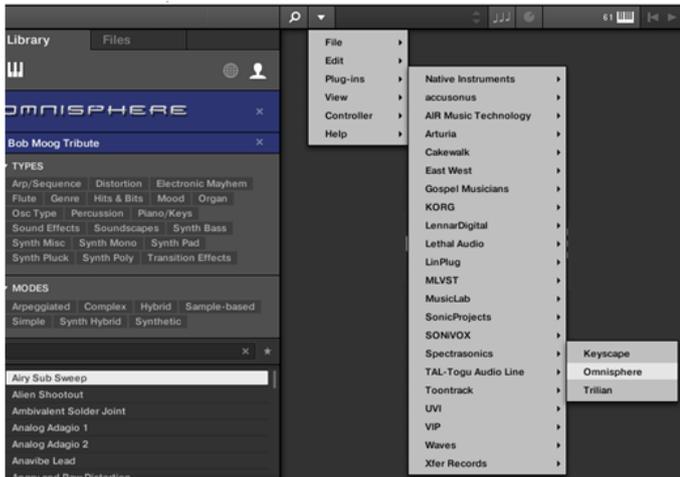

First ensure you have the VST plug-in installed and available to the software. Confirm if you need the VST2 or VST3 version.

In Komplete Kontrol It should already appear in your File > Plug-ins menu.

In Maschine open the plug-in browser and check the VST is listed:
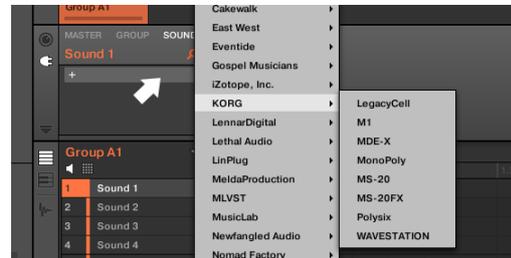

If the plug-in does not appear in these locations you need to check the VST is available at the location set within Preferences. Perform a rescan if any changes are made.
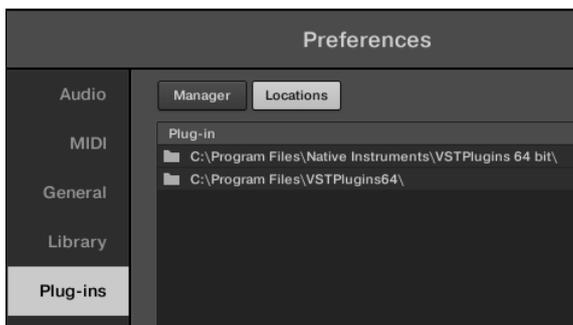

Once the plug-in is confirmed installed and working with the software, copy the preset and artwork (if included) to the following locations:

Database Files: Contains the browser images and database details for the Komplete browser. Place the "image" and "dist_database" folders in the following location (or copy the sub folders inside these folders if they exist):

Windows: C:\Users\Public\Public Documents\NI Resources

MAC: /Users/Shared/NI Resources
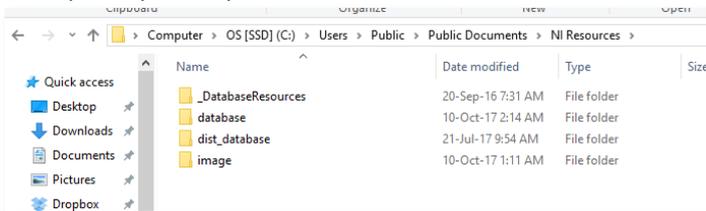

Image Folder Example:
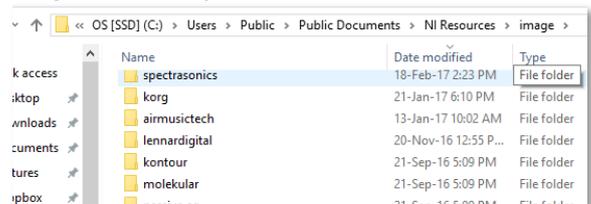

Database Folder Example:

All User library database and image files will be held in these folders with a unique folder for each vendor/plug-in.

> **NOTE: Be sure to <u>copy</u> the sub folders into the above locations. You want to add the folders with the existing folders. <u>Mac users</u> should be cautious NOT to "Replace" the entire image or database folder with the included ones. You must copy these folders INTO the image and database folders (Merge)**

Preset Files: Contains the preset files that need to be added to your user library. Copy this folder to your user library location. By default the user library is located at:

WIN: C:\Users\[USER]\Documents\Native Instruments\User Content

MAC: Users/[USER]/Documents/Native Instruments/User Content

You can confirm this location within the Komplete\Maschine software Preferences > Library > User Library
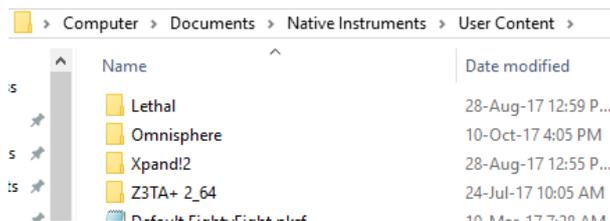

NOTE: If you already have a previous version of this NKS library you should delete it and replace with the latest version.
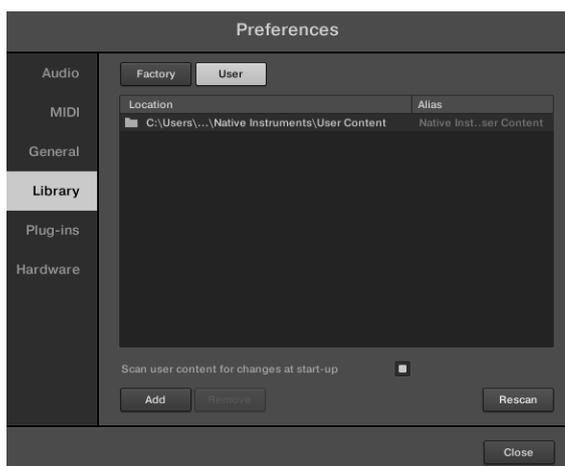

After the files have been copied, launch the Komplete Kontrol in STANDALONE mode to do a library update. If the software is not set to auto-scan on start-up, open Preferences > Library then select Rescan
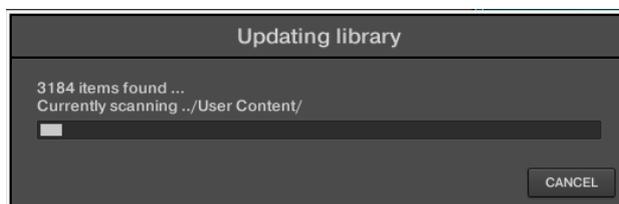

If everything has worked correctly you should now see the plug-in listed in the browser with an assigned category, artwork for the plug-in and the installed presets will be listed in the browser. A new installed library will create a new Bank entry.

Be sure you are looking in the **User Library** as User created NKS files do not appear in the factory library.

Problems?
If artwork is not displayed or the categories are not created there may be differences in how your VST plug-in is labelled compared to the database files. For all issues please visit the Forum Thread
