

NKS PRESET LIBRARY : SPECTRASONICS TRILIAN

For Komplete Kontrol / Maschine

freelancesoundlabs.com

18 November 2022

Intro

Welcome to the Trilian NKS Library for the Native Instruments Komplete Kontrol and Maschine software and hardware.

This library contains 1400+ factory presets for Trilian that can be loaded and browsed directly using the Komplete Kontrol / Maschine software or hardware. All presets have been converted to NKS preset files which contains the Trilian preset information, tagging information and mapped controls. Additionally, a Komplete Kontrol database file and plug-in artwork is also included to create entries in your User Library. Preset files can be browsed by sound type, sub-category, mood, genre from both the standalone Trilian plugin and via an Omnisphere bank. Sound previews are also included.

Compatibility / Requirements

- Komplete Kontrol v2.8+ / Maschine 2.16+
- Supports Maschine Controllers (all versions) / Komplete Keyboards (all versions)
- **Supports VST3** (VST2 is also available using the previous 2.x.x NKS library version)
- Supports PC / MAC
- Requires [Spectrasonics Trilian](#)
- Requires Omnisphere 2.4+ (optional: required for Omnisphere libraries)

This is NKS compatibility files only. This will not work without the actual VST/Library being installed

Download

A free version is available that contains a handful of presets for you to test with.

The full version is available for purchase with an immediate download.

Installation

First ensure you have the VST plug-in installed and available to the software.

In Complete Kontrol It should already appear in your File > Plug-ins menu.

In Maschine open the plug-in browser and check the VST is listed:

If the plug-in does not appear in these locations you need to check the VST is available at the location set within Preferences. Perform a rescan if any changes are made.

Once the plug-in is confirmed installed and working with the software, copy the preset and artwork (if included) to the following locations:

Database Files: Contains the browser images and database details for the Komplete browser. Place the "image" and "dist_database" folders in the following location (or copy the sub folders inside these folders if they exist):

Windows: C:\Users\Public\Public Documents\NI Resources

MAC: /Users/Shared/NI Resources

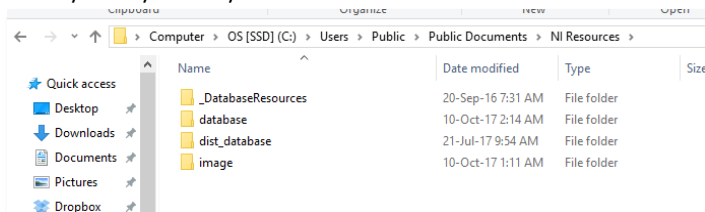

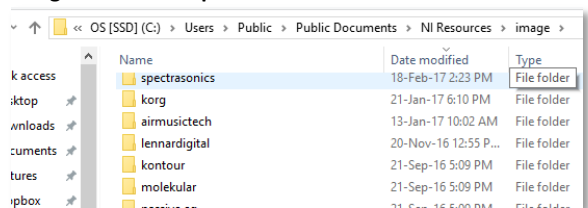

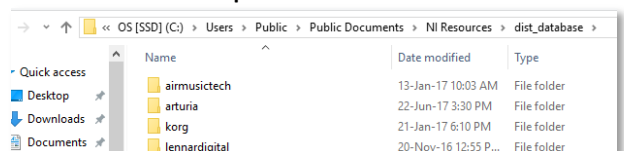

Image Folder Example:

Database Folder Example:

All User library database and image files will be held in these folders with a unique folder for each vendor/plug-in.

NOTE: Be sure to copy the sub folders into the above locations. You want to add the folders with the existing folders. Mac users should be cautious NOT to “Replace” the entire image or database folder with the included ones. You must copy these folders INTO the image and database folders (Merge)

Preset Files: Contains the preset files that need to be added to your user library. Copy this folder to your user library location. By default the user library is located at:

WIN: C:\Users\[USER]\Documents\Native Instruments\User Content

MAC: Users/[USER]/Documents/Native Instruments/User Content

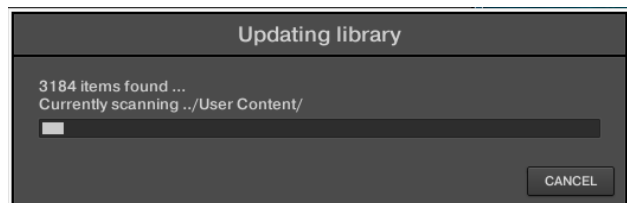

You can confirm this location within the Komplete\Maschine software Preferences > Library > User Library

NOTE: If you already have a previous version of this NKS library you should delete it and replace with the latest version.

After the files have been copied, launch the Komplete Kontrol in STANDALONE mode to do a library update. If the software is not set to auto-scan on start-up, open Preferences > Library then select Rescan

If everything has worked correctly you should now see the plug-in listed in the browser with an assigned category, artwork for the plug-in and the installed presets will be listed in the browser. A new installed library will create a new Bank entry.

Be sure you are looking in the User Library  as User created NKS files do not appear in the factory library.

Problems?

If artwork is not displayed or the categories are not created there may be differences in how your VST plug-in is labelled compared to the database files. For all issues please visit the [Forum Thread](#)

Installation Video PC:

Installation Video Mac:

https://www.youtube.com/watch?v=amzq_T5kc90

The Preset Browser

Presets are accessed by selecting the User library icon at the top of the browser .

Select a library using the bank feature.

You can browse using any tags or reconfigure/rename tags using the tag editor in Komplete/Maschine. Selecting a preset from the list will open the plug-in and automatically load the preset. You can then use the mapped controls to start tweaking the sounds.

Controller Mappings

Controls have been mapped as logically as possible and cover most of the available controls. As of NKS Library update v2.2.0 most of the “Macro/Effect” controls are now labelled the same as the controls in Trilian instead of a generic “Macro” label.

Switches have been added for presets that have switchable macro effects such as enable/disable a compressor. There is a switch for the “Effect” (if the effect is switchable) and 3 for the macro section.

Controller Template Reference

FAQ?

Keep up to date with the latest NKS Library releases, updates and improvements

[Subscribe to our Monthly newsletter](#)

Can these presets be added to the Factory Library?

Yes they can. There are a couple of files that need to be created which are specific to your install locations. There are instructions on how to do this [Here](#)

Which Native Instruments Keyboard/Maschine hardware does this work with?

The NKS libraries will work with ANY Complete Keyboard or Maschine Hardware

I'm not hearing any sound previews?

Check your preview volume is up in the Factory library and check you have a .preview folder with sound files in it. Some presets may have missing files so please report any issues with presets stating the preset name and the instrument/library.

I've noticed some issues

If you find any issues with incorrectly saved presets, sound preview issues, incorrect tagging etc please let us know the details and we will try and fix this up as quickly as possible.

I'm having some installation\usability issues

If you are having issues with installing and using the preset library, check out the [Forum Thread](#) to ask other users who may have some solutions. Also, check above for installation videos. Feel free to contact us if you still have issues.

Images are not displaying for the libraries!

This is normally down to the installation of the database/image folders not being correct. In some cases the plugin name could be different. If you cannot resolve your issue feel free to contact us (links below).

Can I get other VSTs or preset library's created as NKS?

I can only create presets for instruments I own or have a copy of. I am always on the lookout for new VST instruments at good prices so may do more down the track. If you are able to offer me a legal copy of a VST or can transfer me the library I can have a look if it is possible to make NKS compatible. If you are a plugin developere it may also be possible to add NKS compatibility for official factory inclusion. Feel free to contact me.

Income from these libraries helps to develop further libraries and support users. We actively check these libraries are not being distributed and each users download contains a hidden fingerprint which will result in your account being closed if files linked to your account are found available for download elsewhere so please do not distribute with others.

NKS Library: Spectrasonics Trilian Changelog

3.0.0 (19 Nov 2022)

- Updated library to VST3 compatibility
- Added Multi presets

2.6.0 (7 July 2022)

- Unified/Updated tagging over all NKS libraries and set library base version to 2.6.0

2.5.6 (29 May 2022)

- Fixed "Trilian Creative" displaying "Trilian VIP" in Omnisphere for older presets
- Removed the "(omni)" filename tag from Trilian Creative patches (not required)

2.5.5 (12 May 2022)

- Updated Trilian Omnisphere "VIP" library to "Creative"
- Added missing 1.5 presets to creative library
- Updated Trilian display image logo artwork for NKS browser

2.5.4 (3 Dec 2020)

- Update for Trilian 1.5 to add 200 additional presets

2.5.3 (31 July 2019)

- Fixed preview samples not having any sound for "Staccato" presets

2.5.2 (19 April 2019)

- Re-rendered sound previews to address glitch issue at end of file and also reduce size of library.
- Cleaned up and improved some tagging across libraries.
- Some library paths have changed to group some plugins by developer in the user folder.

v2.5.0 (11-Mar-19)

- Updated NKS tagging to NKS 1.5

v2.2.1 (28 Apr 2018)

- Fixed Omnisphere NKS files that had the Latch control switched On by accident

v2.2.0 (21 Apr 2018)

- Added Omnisphere versions of the Trilian presets
- Added the "Trilian VIP" library for Omnisphere
- Re-processed all Trilian presets to fix issue with a Multi being loaded for all presets
- Added more detailed tagging to all presets
- Updated macro/effect controls with labelling from Trilian
- Added version number (2.2.0) to NKS description for files

v2.1.1 (03 Dec 2017)

- Updated tagging to remove duplicate and incorrect tags
- Added splash image for loaded instrument on Maschine MK2/Studio and Complete MK3
- Updated sound preview files with E3 note instead of C1
- Updated documentation

v2.1.0 (22 October 2017)

- Added sound preview files to all factory library presets
- Updated plug-in artwork
- Updated documentation

v2.0.0 (22 October 2017)

- Added Library tags for Trilian library's
- Removed [Library] tag
- Changed layout of controls on pan/glide page to display better on Maschine/S Series MK3 screens

v1.3 (10 December 2015)

- Updated PDF manual to add some additional information and fix some busted links.

Changes For Donor Version Only

- Updated tag for Omnisphere library to [Library] to offer central sub library management for additional VSTs
- Updated tag "Synth Arp" to "Arp/Sequence" for better integration with future preset packs such as Sylenth and other VSTs
- Fixed a few mislabelled tags and some redundant tagging
- Fixed some files tagged as "Bowed Strings" that were only Synth strings. Manually picked through files to tag actual VBowed instruments.
- Added some Mode tags with more to be done as I dive more into using it all.

v1.2 (3 December 2015)

- Fixed issue with Omnisphere main volume set to +2db causing clipping. Reset all presets to 0db (default)
- Fixed issue in database files that caused issues with creating the categories on some users systems
- Fixed mistake in instructions for the installation path of the database files

v1.1 - Release version (1 December 2015)

- Fixed tagging of some mapped controls
- Fixed some spelling mistakes in some of the tags

v1.0 - Initial Version (25 November 2015)
